

HOW TO BUILD CREDIBILITY WITH THE RIGHT APPROACH TO IT RISK, VENDORS, AND CONTROLS

Group Internet

Even in our technology-driven world, some still see information security as a rival to achieving business objectives. The truth is, effective IT risk management actually creates a competitive advantage for organizations. But how can resource-strapped IT risk teams execute this properly while also championing a risk-driven culture? This online course will provide a real-world example of how a cyber risk team is leveraging IT risk management technology to better manage their digital risk and provide more visibility to stakeholders and executives so they can understand their risk and compliance posture.

Who should take this course?

This course is ideal for risk assurance and information security professionals.

Knowledge level	Intermediate
Field of study	<ul style="list-style-type: none">◦ Computer software and applications
Prerequisites	N/A
Advanced preparation	N/A
Recommended CPE credits	1
Most recent review date	August 25, 2020
Delivery method	Group Internet
Expiration date	N/A

To be eligible to receive CPE credits, you must attend the full session and answer ALL polling questions.

What is it about?

In this webinar, IT risk practitioners from an international law firm, will share their journey of implementing IT risk management technology to increase the impact and efficiency of their small department. They'll also discuss which communication tactics were most successful in building trust and accountability with their stakeholders. In the session, they will share how IT risk management technology has allowed them to create a central risk repository, automate risk assessment processes for vendors, and provide more visibility into controls for smoother audits.

How can I register?

Attendees can register by filling out the form [here](#).

What will I learn?

By the end of this course, you'll learn how to:

- How to build a centralized risk registry and how to show results in a dashboard.
- How to automate vendor risk assessment processes and workflows.
- How to leverage continuous controls monitoring to improve audits and identify new risks
