

HOW TO EFFECTIVELY LEVERAGE COMBINED ASSURANCE TO MEET ORGANISATIONAL OBJECTIVES?

Group Internet

In any given organisation, the combined assurance model seeks to mitigate the risk of assurance providers working in silos, thereby making a complete risk picture difficult to obtain. Combined assurance can help, but how? With a well implemented combined assurance model, assurance providers (internal and external) are working more closely together to streamline their work and reporting, enabling them to meet organisational objectives. The new 3 lines model supports this by reference to coordination, collaboration, communication, and alignment between internal audit (3rd line) and management (1st and 2nd lines).

Who should take this course?

This course is intended for auditors. The learnings will be most applicable to internal audit teams but may also be useful to other auditors across all industries. The content is also suitable for any risk assurance professional who is interested in learning about technological trends and agile methods.

Knowledge level	Basic
Field of study	Computer software and applications
Prerequisites	N/A
Advanced preparation	N/A
Recommended CPE credits	1
Most recent review date	
Delivery method	Group Internet
Expiration date	N/A

To be eligible to receive CPE credits, you must attend the full session and answer ALL polling questions.

What is it about?

Join this 60-minute webinar where Liz Sandwith, Chief Professional Practices Adviser at Chartered IIA and Tom Ryan, Manager, Solutions Consulting at Galvanize will give you an introduction to the combined assurance model and its background.

How can I register?

Attendees can register by filling out the form [here](#).

What will I learn?

By the end of this session, you'll learn how to:

- Determine how combined assurance helps meet organisational objectives
- Determine how combined assurance can increase the coordination of assurance providers
- Determine who the key stakeholders are, and who requires assurance within your organisation
- Determine how assurance is delivered to stakeholders

Policies & statements
